Appl. No.: 10/008,491 Filed: 11/13/2001

Amdt. dated 07/23/2007

## Amendments to the Claims:

1. (Currently Amended) A system for providing content for distribution over channels to a plurality of different types of terminals, said system comprising:

a content object including the content to be provided over the channels;

a plurality of rule objects to apply rules to said content object to prepare the content in a first way both for communication over an Internet channel to an Internet terminal and for publication by the Internet terminal connected to the Internet channel, and prepare the content in a second way both for communication over a non-Internet channel to a non-Internet terminal and for publication by the non-Internet terminal connected to the non-Internet channel, wherein the content is prepared in the first way and the second way such that the content remains the same or substantially the same as its original form;

at least one container object to receive said content object and template the prepared content to meet a certain publishing environment specified by a publisher of the content; and

a communication system for communicating the prepared and template content objects over the <u>Internet and non-Internet</u> channels to the <del>publishing</del> <u>Internet and non-Internet</u> terminals connected thereto.

- 2. (Currently Amended) The system according to claim 1, wherein the non-Internet channels include at least one of a video channel and or a print channel.
  - 3. (Canceled).
- 4. (Currently Amended) The system according to claim 1, wherein said content object includes more than one of the following:

text, graphics, image, video and or sound content.

Appl. No.: 10/008,491 Filed: 11/13/2001

Amdt. dated 07/23/2007

5. (Original) The system according to claim 1, wherein each rule object includes at least one rule distinct from other rule objects.

- 6. (Original) The system according to claim 5, wherein the at least one distinct rule is based on a specific channel for which the associated rule object is associated.
- 7. (Original) The system according to claim 5, wherein the at least one distinct rule is based on a specific terminal for which the associated rule object is associated.
- 8. (Previously Presented) The system according to claim 5, further comprising a channel object to receive said content object as prepared by said container object.
- 9. (Previously Presented) The system according to claim 8, wherein said channel object defines a channel of distribution.
- 10. (Currently Amended) The system according to claim 8, wherein said channel object includes at least one of the following channels:

Internet, wireless, cellular, and or satellite.

- 11. (Previously Presented) The system according to claim 8, wherein the at least one rule defines a process for which said content object is subject to for distribution over a particular channel.
- 12. (Original) The system according to claim 11, wherein the process includes reducing the amount of data to be distributed.
- 13. (Previously Presented) The system according to claim 11, wherein the particular channel is predetermined by said content publisher.

Appl. No.: 10/008,491 Filed: 11/13/2001

Amdt. dated 07/23/2007

- 14. (Original) The system according to claim 8, further comprising a directory lookup service for assigning said content object to at least one rule and at least one container object.
  - 15. (Original) The system according to claim 9, further comprising an object broker.
- 16. (Previously Presented) The system according to claim 8, wherein the container object applies a publication template to said content object for display.
  - 17. (Currently Amended) A method comprising:

receiving content provided for distribution over at least one channel to a plurality of different types of terminals;

applying rules to the content based to prepare the content in a first way both for communication over an Internet channel to an Internet terminal and for publication by the Internet terminal connected to the Internet channel, and prepare the content in a second way both for communication over a non-Internet channel to a non-Internet terminal and for publication by the non-Internet terminal connected to the non-Internet channel, wherein the content is prepared in the first way and the second way such that the content remains the same or substantially the same as its original form; and

communicating the prepared content over both the <u>Internet and non-Internet</u> channels to the <u>Internet and non-Internet</u> terminals connected thereto.

- 18. (Currently Amended) The method according to claim 17, further comprising templating the prepared content in accordance with a publishing environment specified by the a content provider.
- 19. (Previously Presented) The method according to claim 17, wherein the non-Internet channel is a newspaper print publication channel and the non-Internet terminal is a newspaper printer.

Appl. No.: 10/008,491 Filed: 11/13/2001 Amdt. dated 07/23/2007

Claims 20. - 21. (Canceled)

22. (Currently Amended) The method according to claim 17, wherein the content includes more than one of the following:

text, graphics, image, video, and or audio.

Claims 23. - 37. (Canceled)

38. (Currently Amended) A system for content publication, the content to be published being represented by a publisher specified content object specified by a content publisher, comprising:

a rule object operable on the content object to modify the content object based on a channel and/or terminal used in publishing the content, the rule object including a content publisher selected one of a plurality of distribution channel rules each specifying modifications to content objects so as to facilitate publication of the content over one of a plurality of different distribution channels, and further including a content publisher selected one of a plurality of terminal rules each specifying modifications to content objects so as to facilitate publication of the content by one of a plurality of different terminals, wherein the plurality of distribution channels are arranged in parallel to one another; and

a container object operable to template the content object as modified by the rule object to meet a certain publishing environment specified by the content publisher;

wherein the distribution channel rules include a first distribution channel rule that is content\_publisher selectable for Internet-based distribution of the content, and a second distribution channel rule that is content\_publisher selectable for non-Internet-based distribution content; and

wherein the terminal rules include a first terminal rule <u>that is content-publisher selectable</u> for Internet-based terminal publication of the content, and a second terminal rule <u>that is content-publisher selectable</u> for non-Internet-based terminal publication of the content.

Appl. No.: 10/008,491 Filed: 11/13/2001

Amdt. dated 07/23/2007

39. (Previously Presented) The system of claim 38 wherein the non-Internet-based terminal publication of the second terminal rule comprises a printing terminal publication of the content.

40. (Previously Presented) The system of claim 38 wherein the non-Internet-based terminal publication of the second terminal rule comprises a video display terminal publication of the content.
